Make MyCommsuite key to your revenue and membership strategy.

Profit from MyCommsuite, Deutsche Telekom ICSS's unified communications services to leverage a supporter base in a Web 2.0 world. Tap into the power of your supporter base by offering it a new range of services accessible from one easy platform.

It is the ultimate communications suite that provides you with a direct channel into the homes of your supporters and rewards them for being your greatest fans.

The Internet and communications combined in a new suite of services.

A revolution on the web makes communications services and telephony available to organizations like yours. Deutsche Telekom ICSS has combined them into a suite of unified communications tools. Because it's Web 2.0, MyCommsuite is accessible wherever you get the Internet and requires no network infrastructure to run or administer.

If you:

- Are looking for new revenue sources
- Want an innovative way to harness the power of your supporter base
- Recognize the power of the Internet to communicate with your members

MyCommsuite is for you.

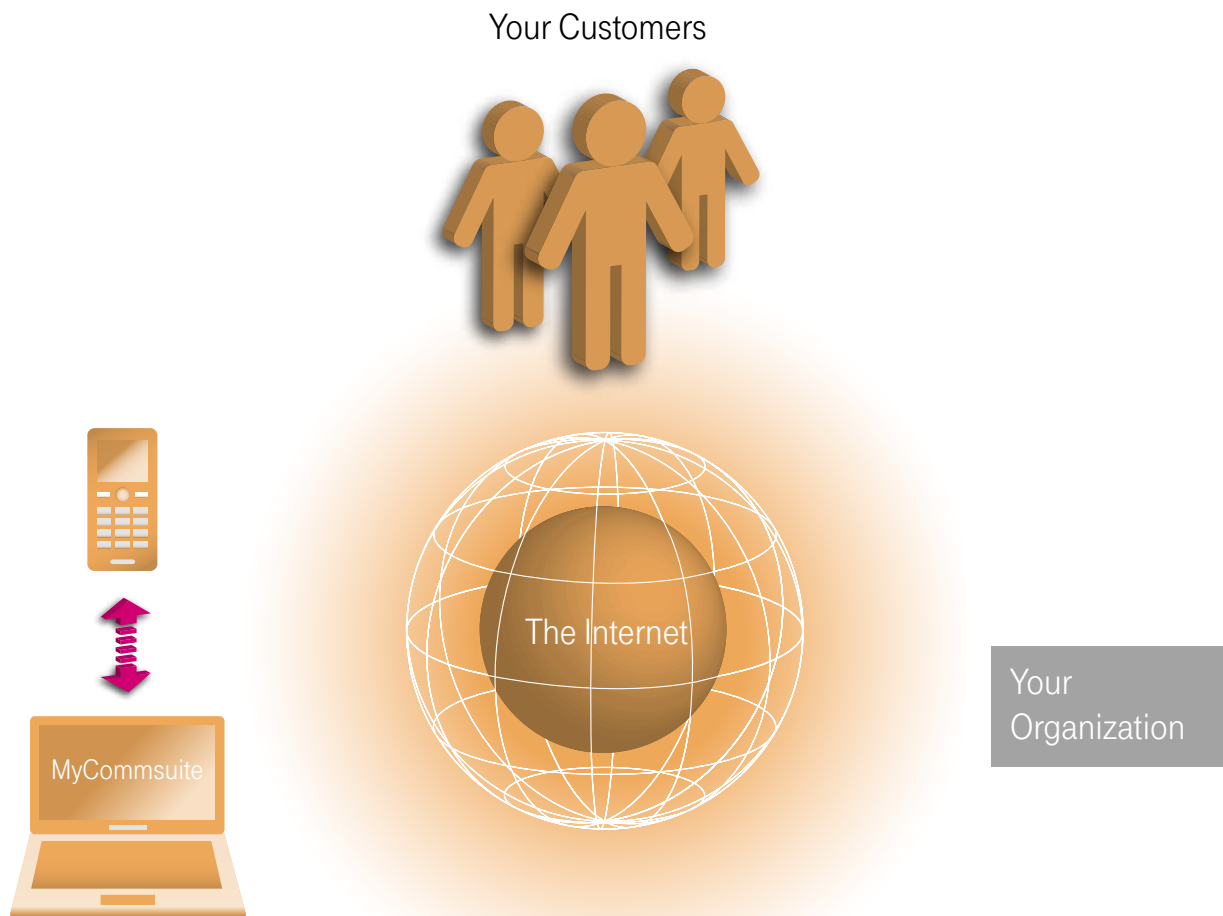

Fully featured: 10 modules make up MyCommsuite

- E-mail: full e-mail client
- Instant Messaging: buddy list, presence information and exchange of instant messages
- Calendar: integrated calendar
- Soft Phone: for on-net and off-net calling, possibility for use of hardware SIP phones
- Video Calling: one-to-one video calling
- Files: online file sharing
- My Media: media player for photos, video and music
- News: news RSS feed aggregator
- Social Networks: aggregator for Facebook, Flickr and Twitter accounts
- Contacts: address book

Easy to access, easy to use, easy to customize.

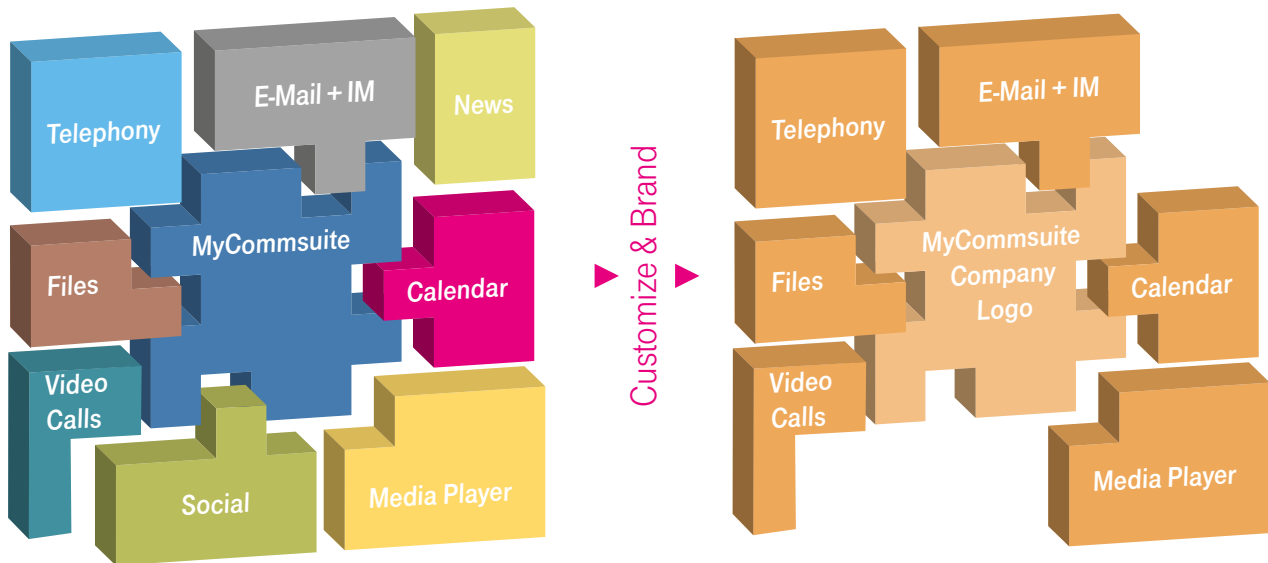

You choose which features you want: MyCommsuite is modular which means that you choose the features that your supporters will want. For example: you don't need the News module? Just leave it out of the platform when setting it up.

MyCommsuite – wherever you get the Internet

MyCommsuite is modular

Rename it and rebrand for total control of the customer experience.
You customize the branding.

Rename and rebrand it for control of the supporter experience.

You customize the branding: MyCommsuite is open-branded – you rebrand and rename MyCommsuite to match your organizational livery. This means you can offer your customers a completely proprietary, customized suite of communications services under your own brand.

A Web-based communication and social network – built around your organization.

Benefits for you.

- Organize your membership and open channels of communication with them
- Save on communication costs by using MyCommsuite as an in-house communications platform

Benefits for your supporters.

- They gain access to people like them – a ready-made digital social network
- Better services including VoIP telephony

MyCommsuite provides multiple revenue opportunities.

Generates funds for your organization – the end of the raffle ticket. Revenues are generated in any or all of three ways:

1. Subscriptions to the service
2. Telephony and SMS revenues
3. Advertising on site

Technical features.

Speed and size

- MyCommsuite is less than 2 MB in size and uses an XML interface as the messaging, scheduling, and signaling API
- MyCommsuite uses lightweight XML requests to the server, dramatically increasing performance

Fluid and dynamic feel

- Intuitive, elegant, and sleek design with advanced collaboration features
- Drag-and-drop features with no page refreshing

Push to mobile

- Mobile synchronization for e-mail, calendar, and address book with smartphones like the iPhone, Nokia N series and more

Portability

- Works with any OSX, Windows, Linux or Solaris browser using Flash 9 or higher

Security

- Core to the design – runs as a binary in memory space, not using the browser cache

Media integration

- The design allows powerful mashups with external sources of media and content such as the Adobe Flash Media Server™
- HD-quality video (H.264) and audio AAC3
- Snap-in media and entertainment modules
