

Global Corporate Access (GCA).

International Carrier Sales & Solutions (ICSS)

Life is for sharing.

Mobile
World

Seamlessly mobilize your customers' workforce.

Increasingly distributed workforces, multiple wireless networks, and the proliferation of devices: serving the needs of international corporations is exceedingly challenging as the demand for global remote access is constantly growing and becoming more complex in terms of coverage, flexibility, efficiency, quality, and security.

To successfully cope with these challenges, you need to provide a flexible solution that meets all your customer's expectations. Deutsche Telekom ICSS's Global Corporate Access (GCA) solution provides seamless mobility to your customer's workforce irrespective of device, access method, and location.

Discover GCA – ICSS’s one-stop-shopping solution for unlimited connectivity.

Partner with Deutsche Telekom ICSS to benefit from GCA – a comprehensive solution that provides your corporate customers with seamless connectivity whenever and wherever needed at attractive pricing and with great user experience.

Global coverage:

Enjoy instant access to the largest access network worldwide based on different kinds of fixed and wireless connection media, such as WiFi, Ethernet, and in-flight WiFi.

Software client:

The software client is customizable and can be branded by yourself or your corporate customers. The user interface of our client is characterized by its intuitive ease of use. With just one click, GCA automatically establishes a quick, secure connection to the customers’ corporate network and its applications.

Value-added services:

Smoothly integrate value-added services such as the central Web portal for user management, reporting, and configuration into your solution. The solution enables you to easily monitor and control your customers’ connections and provides you with a comprehensive set of performance data that help you to manage your customers.

Security:

Make use of a vast variety of advanced protection features for optimal security management to ensure that the solution meets highest security standards of your customers. The platform supports existing VPN, antivirus, and firewall applications, as well as the latest encryption technologies tailored to your customers’ business requirements.

Device support:

An increasingly immense selection of devices is used to access the Internet. We ensure that latest mobile devices, tablets, handsets (e.g., iPhone, iPad, Blackberry, Win-Mobile, Symbian, Android), and data cards are supported.

End-to-end solution:

Profit from a complete solution that can be fully white-labeled for you and your customers!

Reliability of a carrier-grade platform.

GCA is based on a carrier-grade SaaS management platform that allows carriers to manage and maintain all core elements of the solution in the cloud. Customer administration, authentication management, network and client customization, support, and maintenance are key elements that ensure long-term success with a global solution for corporate access.

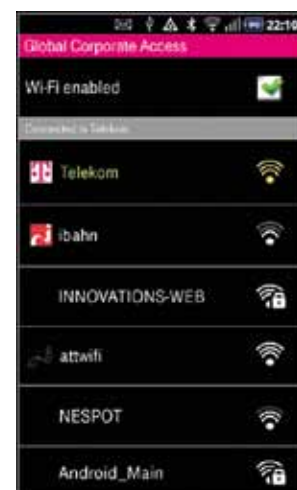

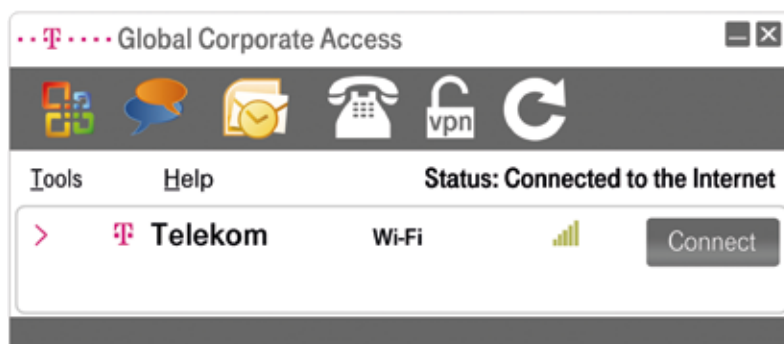

GCA carrier authentication:

Based on your individual requirements, you can choose between managed user authentication on our central platform or, most likely for your large enterprise customers, the integration of your existing AAA infrastructure for user management. Our carrier authentication solution is easy to implement, easy to manage, and easy to maintain.

GCA carrier network:

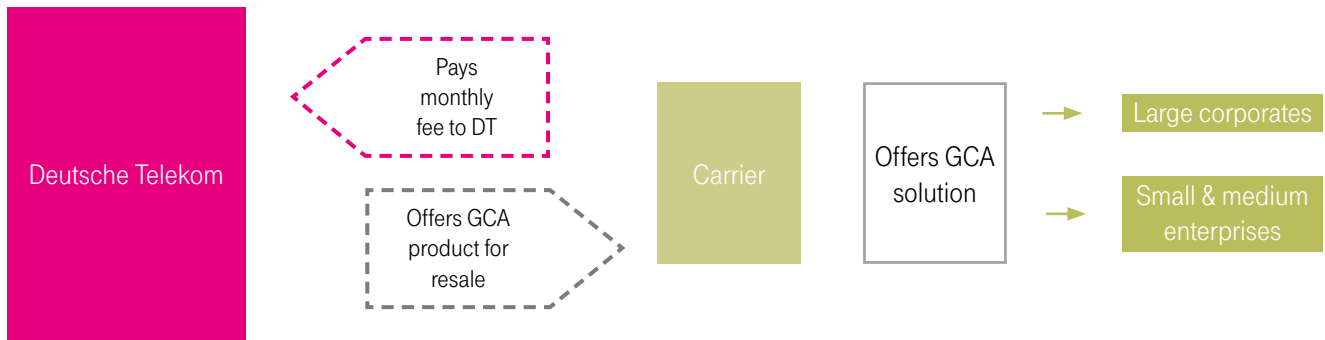

A large variety of fixed and wireless access types is supported globally. By gaining connectivity to the largest WiFi network in the world, you can remarkably increase your coverage and optimize your roaming. The GCA client application under Microsoft Windows can manage your 3G connections.

GCA customizable software client.

Simple, quick, and safe-highest convenience for the end user: just one click and the connection is automatically up and running.

GCA business model.

Partnering for our GCA solution gives you the flexibility to combine features into a tailored offering that best serves your and your customers' requirements.

GCA carrier client pool:

Our client administration and customization portal provides you with a single user interface for all networks and devices. It intelligently and automatically establishes the connections based on the policies that have been set up and tailored to your needs.

GCA carrier support maintenance:

With minimal resources and investment on your side, you can trust our long-track record to deploy a complete solution with a short-time to market. Count on Deutsche Telekom's dedicated and experienced team of experts, who are ready to plan, build, and run your end-to-end GCA solution for your customers. In the planning phase, we provide technical consultation to design the solution and adapt it to your requirements. In the implementation phase, we provide support to set up, customize, and deploy the solution. In the operation phase, we provide you with dedicated support and 24/7 third-level customer support.

Key benefits for ICSS's partners:

Focus on your core business while we take care of developing the solution to mobilize your corporate customers.

Broaden your offering and attract more business customers:

With our one-stop-shopping solution, you provide your customers with a global solution for convenient access anywhere at any time.

Improve your brand perception:

Position your company as a competent provider of mobility products with the help of GCA, a solution that can be entirely white-labeled for you and your customers.

Reduce the churn rate of your customers:

Achieve highest customer retention and broaden your offer to a truly global scale.

Extensive support and maintenance services:

We support you from the very beginning. Rely on our expertise in planning, deploying, and running your project based on our support 24 hours a day, seven days a week.

Major benefits for your customers:

With GCA, you can perfectly meet your customers' needs for unlimited connectivity on a global scale.

Global access irrespective of device and network:

The workforce can always and anywhere access to the company's corporate data and applications.

Convenient user experience:

Customers enjoy the use of a simple, intuitive client that is easy to install and provides hassle-free access to all communication platforms.

Highest level of security:

Our integrated safety concepts ensure maximum protection of your customers' corporate data and guarantee full control of who has access.
